Office Action Summary

Art Unit: 2124

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 26-27 are, drawn to a method for **generating random numbers**, classified in class 708, subclass 250.
  - II. Claims 47-50 are, drawn to a method for generating and applying random numbers, classified in class 463. It is noted that although the preamble of claims 47-50 recite a method for generating and applying random numbers, the body of the claims do NOT recite generating random numbers.
2. The inventions are distinct, each from the other because of the following reasons:

Each group of claims is directed to a separate invention. It is noted that the groups maybe belong to a system. However, this is not sufficient to prevent a restriction requirement.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. It is noted that **CLAIM 28** has been canceled. In the Preliminary Amendment filed 8/31/1998, original **claim 28** is cancelled. New claims **28-45** have been renumbered as new claims 29-46.
